Profile

Aspiring Software Engineer with proficiency in Java, Spring Boot, SQL, and Data Structures & Algorithms. Hands-on experience developing software applications through academic and personal projects, along with a Data Science internship focused on data processing and analysis. Passionate about building efficient, scalable, and reliable software solutions.

Education

SR University

BTech in Computer Science

Warangal, India

Present

- Expected Graduation: may 2027

Work Experience

Edzeeta Private Limited

Data Science Intern

Warangal, India

02 may 2024 - 25 july 2024

- Processed and cleaned real-world datasets using Python, NumPy, and Pandas, ensuring data quality and consistency for analysis.
- Performed data preprocessing and exploratory data analysis (EDA) on structured datasets to identify patterns and derive meaningful insights.
- Developed data processing workflows and automated data handling tasks, strengthening understanding of data pipelines and backend data processing concepts.
- Collaborated in a team environment to analyze datasets, communicate findings, and deliver project outcomes within deadlines.

Projects

EduPulse-AI (Hackathon Project)

St.JOSEPH'S College Of Engineering

Semmancheri, Chennai

26 Feb 2026 - 27 Feb 2026

- Developed a student risk prediction system using Python to identify potential dropout cases based on attendance and academic performance.
- Processed and preprocessed structured student datasets, including data cleaning and feature selection, to improve model readiness.
- Implemented a Logistic Regression model to classify students into high-risk and low-risk categories.
- Generated actionable insights through predictive analysis to support early identification and intervention for at-risk students.

Skills

Programming Languages	Java, HTML/CSS, JavaScript, SQL.
Frameworks & Technologies	Spring Boot, REST APIs, MVC Architecture.
Database	MySQL.
Tools	Git, GitHub, Postman, VS Code.
Core Concepts	Data Structures and Algorithms, OOP.
Cloud	AWS (Basic).
